

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A package for containing and displaying at least one article comprising

- a back panel, and
- a front panel attached to said back panel,
- wherein said front panel comprises a blister pack formed of plastic and including a first outward projecting portion in a bottom portion of said blister pack and at least one additional outward projecting portion having a depth and shape conforming to at least a portion of said at least one article,

wherein at least a portion of said first outward projecting portion extends widthwise at least a substantial portion between a first side of said blister pack and a second side of said blister pack, and has a depth outward sufficient to allow said package to stand substantially upright, and

wherein said depth of said at least a portion of said first outward projecting portion is ~~configured in~~ relation equal to a greatest depth of an outermost projecting portion of said at least one additional outward projecting portion so that said package is

self-indexing when said package is aligned with one or more packages having a structure of said package.

2. (Currently Amended) A blister pack for a display package for at least one article, said blister pack comprising

a plastic body including a first outward projecting portion in a bottom portion of said body, with at least a portion of said first outward projecting portion extending widthwise at least a substantial portion between a first side of said body and a second side of said body, and said at least a portion of said outward projecting portion having a depth outward sufficient to allow said body to stand substantially upright, and

said body further including at least one additional outward projecting portion having a depth and shape conforming to at least a portion of said at least one article,

wherein said depth of said at least a portion of said first outward projecting portion is ~~configured in relation~~ equal to a greatest depth of an outermost projecting portion of said at least one additional outward projecting portion so that said blister pack is self-indexing when said blister

pack is aligned with one or more blister packs having a structure of said blister pack.

3. (Original) A package according to claim 1 wherein said at least one additional outward projecting portion is continuous with said first outward projecting portion.

4. (Original) A blister pack according to claim 2 wherein said at least one additional outward projecting portion is continuous with said first outward projecting portion.

5. (Original) A package according to claim 1 wherein said first outward projecting portion includes a bottom wall having integral therein at least two spaced apart downward protrusions.

6. (Original) A blister pack according to claim 2 wherein said first outward projecting portion includes a bottom wall having integral therein at least two spaced apart downward protrusions.

7. (Original) A package according to claim 1 wherein said first outward projecting portion includes a front wall of uniform depth or non-uniform depth.

8. (Original) A blister pack according to claim 2 wherein said first outward projecting portion includes a front wall of uniform depth or non-uniform depth.

9. (Original) A package according to claim 7 wherein one of said portions of non-uniform depth is a wall of one of said at least one additional outward projecting portion.

10. (Original) A blister pack according to claim 8 wherein one of said portions of non-uniform depth is a wall of one of said at least one additional outward projecting portion.

11. (Original) A package according to claim 1 wherein said first outward projecting portion is substantially rectangular.

12. (Original) A blister pack according to claim 2 wherein said first outward projecting portion is substantially rectangular.

13. (Previously Presented) A package for containing and displaying at least one article comprising

- a back panel, and
- a front panel attached to said back panel,
- wherein said front panel comprises a blister pack formed of plastic and including a first outward projecting portion in a bottom portion of said blister pack and at least one additional outward projecting portion having a depth and shape conforming to at least a portion of said at least one article,

wherein at least a portion of said first outward projecting portion extends widthwise at least a substantial portion between a first side of said blister pack and a second side of said blister pack, and has a depth outward sufficient to allow said package to stand substantially upright, and

wherein a portion of said at least one additional outward projecting portion is equal in depth to a greatest depth in the first outward projecting portion and is at a position in said package to render said package self-indexing when said package is aligned with one or more packages having a structure of said package, and a portion of said depth of said at least one additional outward projecting portion is of lesser depth than the greatest depth in the first outward projecting portion.

14. (Previously Presented) A blister pack for a display package for at least one article, said blister pack comprising

a plastic body including a first outward projecting portion in a bottom portion of said body, with at least a portion of said first outward projecting portion extending widthwise at least a substantial portion between a first side of said body and a second side of said body, and said at least a portion of said outward

projecting portion having a depth outward sufficient to allow said body to stand substantially upright, and said body further including at least one additional outward projecting portion having a depth and shape conforming to at least a portion of said at least one article,

wherein a portion of said at least one additional outward projecting portion is equal in depth to a greatest depth in the first outward projecting portion and is at a position in said blister pack to render said blister pack self-indexing when said blister back is aligned with one or more blister packs having a structure of said blister pack, and a portion of said depth of said at least one additional outward projecting portion is of lesser depth than the greatest depth in the first outward projecting portion.

15. (Original) A package according to claim 1 wherein two of said at least one additional outward projecting portions are present wherein said two of said at least two additional outward projecting portions are of different depths from each other.

16. (Original) A blister pack according to claim 2 wherein two of said at least one additional outward projecting portions are present wherein said two of said at

J-3763/USSN 10/699,335
Group Art Unit 3728

least two additional outward projecting portions are of
different depths from each other.

Claims 17-34 (Canceled).
